🔗 LeetCode

Education

Visvesvaraya Technological University (VTU)

Bachelor of Engineering in Computer Science and Engineering (CGPA: 7.8/10.00)

Bengaluru, India

Nov 2022 - May 2026

Army Public School, Hempur

Class XII, C.B.S.E (Percentage: 78.60%)

Uttarakhand, India

Apr 2021 - May 2022

Army Public School, Hempur

Class X, C.B.S.E (Percentage: 82.40%)

Uttarakhand, India

Apr 2019 - May 2020

Experience

MindMatrix

Software Engineering Intern

Bengaluru, India

Feb 2026 - May 2026

- Developed a mobile-first healthcare application for infant care, leveraging Spring Boot and Room DB for robust offline capabilities.
- Automated immunization tracking via Android WorkManager, connecting to Supabase PostgreSQL for secure cloud synchronization.
- Integrated Google Gemini API for dynamic nutritional analysis, offering personalized diet recommendations for infants.
- Collaborated with cross-functional teams using Git and Agile methodologies, accelerating features delivery schedules by 15%.

Projects

Shishu-Sneh (Smart Baby's First Year Guide)

May 2026

Technologies: Spring Boot 3.4.5, Java 17, Android Native, Room DB, Supabase, Gemini API

- Engineered an offline-first infant healthcare app utilizing Room DB and Supabase PostgreSQL for local persistence and cloud sync.
- Developed a Spring Boot backend to automate immunization tracking against the Indian NIS via Android WorkManager notifications.
- Integrated Google Gemini API to build a dynamic nutrition engine processing real-time user ingredients for localized recipes.
- Implemented data visualization dashboards using MPAndroidChart to parse health logs and render growth trends.

Advanced Skin Cancer Detection System

Nov 2025

Technologies: Python, Flask, React, Tailwind CSS, XGBoost, Roboflow API, SQLAlchemy

- Built a full-stack AI web app for skin cancer detection achieving 85-90% test accuracy using ensemble ML models.
- Designed 10+ Flask REST APIs with SQLAlchemy and a responsive React UI supporting real-time medical image analysis.
- Implemented XAI, confidence scoring mechanisms, and automated 100% of medical report updates via PDF generation.

Drug Inventory and Supply Chain Tracking System

Jun 2025

Technologies: React.js, Node.js, Express.js, MongoDB, REST APIs, Data Visualization

- Engineered a full-stack supply chain platform enabling end-to-end traceability across 6 roles, improving transparency by 35%.
- Built real-time inventory monitoring features, reducing system stock-outs by 30% and improving fulfillment speed by 25%.
- Developed secure role-based access controls and analytics dashboards, increasing operational decision-making efficiency by 40%.

Technical Skills

- **Languages:** Java, Python, JavaScript, HTML, CSS
- **Databases:** MySQL, PostgreSQL
- **Tools:** Git, GitHub, Maven, Gradle, Supabase
- **AI/ML:** Google Gemini API, Prompt Engineering, Agent Creation, XGBoost
- **Developer Tools:** GitHub Copilot, Cursor, Codex, Claude, Chat2DB

Scholastic Achievements

- Solved 100+ Data Structures and Algorithms problems on LeetCode, strengthening problem-solving and algorithmic thinking skills.
- Secured 1st position in a competitive Code Debugging Session, demonstrating debugging agility and technical problem-solving.
- Awarded 2nd position in Python for Data Science Workshop, showcasing data manipulation and structural analysis proficiency.
- Won 2nd position at Project and Research Expo 2025 for the project "Skin Cancer Detection Using Deep Learning Techniques".
